ADD MY
LOCATION

ADD MY LOCATION TO THE SCREENWEST GALLERY

We want high quality photos, most point and shoot digital cameras will work just fine. The file size of each photo must not exceed 8MB. Photos must be uploaded as JPEG files. You can submit a maximum of 20 photos of your property. Make sure they count.

WHAT SHOULD I PHOTOGRAPH?

Filmmakers, location managers and scouts are looking for interesting and unique locations.

They only have a short time to look at photos and understand the property's overall aesthetic. So, make sure you photograph all rooms that are available and the outdoor area.

The images of your property should include:

FEATURE FILMS

Take photos in a wide angle or landscape view. You can do this by taking photos across the street from your property. Photos that are too small will not sell your location.

Take photos when cars aren't driving past. Avoid things that obstruct the view e.g. trees.

Upload at least:

- 2 x photos of the front of your property
- 2 x photos of the back of your property
- 2 x photos of your street
- 1 x photo of any unique features e.g. tennis court, extra building or land etc.

INTERIORS (INSIDE)

Take photos in a wide angle or landscape view. You can do this by taking photos from one corner of the room and then from the other. Make sure you get the whole room in the photo.

Don't take pictures when it's too dark or light outside.

Upload at least:

- 1 x photo of each available room.

When registering your property with Screenwest please note the following information in your submission: what is the style, period, layout, view of the property and other interesting information.

- What are the noise levels like?
- Are there issues with passing traffic, trains, aircraft or local schools etc.?
- Do you have parking on site? E.g. None, 1-2 cars, 2-5 cars etc.
- What other parking is available?
- Are there parking restrictions on the road outside?
- Is there a large car park nearby that crews may be able to use?

OTHER GENERAL TIPS

- ☐ If you have more than one property, please submit information and photos for each separately.
- ☐ Make sure ALL images are current. Older photos that have been converted to digital files tend to be grainy.
- ☐ Be sure to title each photo (i.e. Kitchen, Bathroom, Front of house, etc.)
- ☐ Do not submit overly detailed photos. We don't need to see the decorative details of a fireplace. You should capture the overall aesthetic of the room.
- ☐ Don't take pictures when it's too dark or light outside or during inclement weather.
- ☐ Staged photos highlighting people, pets or objects will not be accepted. Staged or detailed photos don't sell your property. Filmmakers want to see a blank canvas to picture their story on.
- ☐ Do not submit video clips, renderings, or brochures – just photos of the actual locations.
- ☐ If the property is due to be sold or drastically remodelled in the very near future, please wait to submit photos until the property is in its “final” condition.
- ☐ Ensure all photos are properly rotated.

LET'S DO THIS

ATTENTION THE SUBMISSION FORM WILL NOT WORK ON A SMARTPHONE OR TABLET.

Please use a desktop or laptop computer to submit your location.
